## SUMMARY

Accomplished Front End Developer with 16 years of experience, specializing in designing and implementing front-end architectures using React and Next.js. Proven track record of enhancing application performance and user experience, achieving ADA compliance, and leading development teams. Skilled in JavaScript, HTML, CSS, and responsive design, seeking to leverage expertise in a dynamic Front End Developer role.

## WORK EXPERIENCE

### Wilco

#### Sr. Frontend Engineer

Apr 2021 - Present

- Lead the introduction of AI-powered development tools across engineering workflows, enhancing code review processes with AI-driven pull request review agents.
- Build and introduce AI-based tools for product managers, improving alignment between design and engineering and increasing delivery speed.
- Implement QA automation systems leveraging AI, streamlining testing processes and improving overall software quality.
- Drive a 25%+ increase in team productivity while maintaining or exceeding existing quality standards across delivery pipelines.
- Develop an end-to-end AI engineering pipeline to automate and optimize the software development lifecycle.
- Design and implement front-end architecture using React and Next, supporting over 150 clients in the mortgage industry.
- Lead daily standup meetings and organize grooming sessions to ensure project alignment and progress.
- Conduct code reviews and participate in pair programming to maintain and improve code quality.
- Migrate the front-end architecture from a monorepo to a multi-repository structure, adopting Atomic Design principles for improved scalability and maintainability.

### Fuzzy

#### Sr. Frontend Engineer

Oct 2020 - Apr 2021

- Refactored a substantial legacy WordPress application to Next.js with a Nacelle backend, doubling e-commerce site load speeds and contributing to a 30% customer growth.
- Achieved 100% unit test coverage, implemented responsive and adaptive designs, and ensured ADA compliance for the first time in the company's history.

### Holonis

#### Software Engineer

Sep 2018 - Oct 2020

- Migrated a legacy Angular application to React, implementing a UI library based on Atomic design principles to ensure consistency and facilitate future development.
- Developed and optimized features for video content playback and large image management, enhancing user experience and application performance.
- Integrated Google Ads and implemented SEO improvements to boost application visibility and engagement.

### Netsapiens

#### Software Engineer II

Mar 2017 - Sep 2018

- Developed a video/audio/chat meeting portal utilizing React and PHP with WebRTC technology, which is now employed by hundreds of companies in the hospitality industry.

- Contributed to the creation of a telemarketing portal using React and D3.js, enabling enhanced performance tracking through data visualizations.
- Implemented real-time client interaction features to improve communication efficiency in telemarketing operations.

Edisen

*Sr. Frontend Engineer*

Apr 2013 - Mar 2017

- Developed a platform for interdepartmental collaboration and media file sharing, integrating Node.js and React with web sockets for real-time communication.
- Designed and implemented an internal chat feature enabling users to collaborate by uploading and downloading large media files stored in AWS S3 buckets.
- Created a metadata management tool allowing users to modify existing asset information efficiently.

Miva

*Frontend Developer*

Aug 2012 - Apr 2013

- Assisted customers by implementing new features and resolving bugs on their existing websites, ensuring enhanced functionality and user satisfaction.
- Collaborated with clients to address technical issues, contributing to the improvement of overall customer support services.

RunningFish Design Studio

*Web Developer*

Feb 2009 - Feb 2009

- Developed customized websites from concept to completion for restaurants, bars, and small retail businesses, ensuring each design met client-specific requirements and enhanced their digital presence.
- Conducted individual consultations to deliver tailored development plans, incorporating SEO optimization, website design, and logo creation to effectively meet diverse client needs.

AlpnRock

*Webmaster*

- Collaborated with the CEO to enhance the Shopify e-commerce platform by redesigning the theme, improving user experience and site functionality.
- Developed and implemented payment and discount features, contributing to a more streamlined and efficient online shopping experience.

Clarify Medical

*Webmaster*

- Developed an E-commerce platform using Magento for a new product launch, collaborating with the marketing team to ensure seamless integration with Google ads.
- Coordinated with marketing to incorporate social engagement features, enhancing online visibility and customer interaction.

Vertical HR

*Frontend Developer*

- Collaborated with company founders to develop the frontend of a human resources management system using Next.js and Tailwind, integrated with a Node.js backend.
- Enhanced user interface and experience, contributing to the comprehensive management of human resources departments.
